Welcome to...

textexpander ®

First sign in to your account, then
you can get started by making
a snippet!

A good snippet is...

Something you type a lot:
    email address
    phone number
    email signature

With an abbreviation that's:
    easy to remember
    easy to type

TextExpander also comes with groups of snippets to get you started...

Emoji,
Accented Words,
Symbols, and more.

ångström
Soirée

To add one of these groups
tap Groups,
tap +,
tap Add Predefined

Type snippets in any app with the custom keyboard.
Open your Settings app to
General > Keyboard > Keyboards
Add New Keyboard >
TextExpander
(under "Third-Party Keyboard")
and switch on the English keyboard.
After adding the keyboard, tap it
and switch on "Allow Full Access."
Open any app and tap in a text field
so that the keyboard appears.

Tap the globe key to switch to the TextExpander keyboard and start typing snippets.

TextExpander-enhanced apps also support advanced features such as rich text snippets, and the use of any keyboard. To find those apps:

Tap ? or Settings, then tap TextExpander-enhanced apps.

TextExpander snippets are shared automatically with all your devices. Seamlessly share groups of snippets with your team.

Tap to begin...
